INTERNSHIP

MERN Stack Developer Intern

Jun 2025 – Jul 2025

CodeBeat, Silicon University · Bhubaneswar

- Developed full-stack web applications using MongoDB, Express.js, React.js, and Node.js.
- Built and integrated RESTful APIs for efficient frontend–backend communication.
- Delivered responsive, mobile-friendly UIs and contributed to production-ready features.

PROJECTS

QuickBite — Online Food Ordering System

MongoDB · Express.js · React.js · Node.js · JWT

Developed a full-stack food ordering platform with secure JWT authentication, restaurant browsing, cart management, online order placement, and real-time order tracking.

Built role-based dashboards for customers and administrators, with responsive UI and RESTful API integration.

☐ quick-bite-eight-pi.vercel.app

Career Hive — Job Portal

MongoDB · Express.js · React.js · Node.js

Developed a full-stack job portal enabling employers to post and manage job listings while candidates can search, filter, and apply for opportunities.

Implemented role-based access control, secure authentication, responsive UI, and RESTful API integration.

☐ <https://careerhive-portal.vercel.app>

Car Booking Website

React.js, Tailwind CSS

Developed a responsive car booking application with vehicle browsing, booking interface, and reusable component-based architecture.

Designed a modern, user-friendly UI with seamless navigation and optimized performance.
